Chhaya Kumari

Data Analyst

Saroda, Ahmedabad | chhayachoudhary620@gmail.com | +91 9693160764 | LinkdIn

SUMMARY

Data Analyst with **6+ months of hands-on experience** across **financial analytics** and end-to-end **data analytics projects**, **leveraging SQL**, **Python**, **Power BI**, **Excel**, **ETL**, **Data Cleaning**, **Data Modeling**, **Exploratory Data Analysis** (EDA), **Dashboard** Development, KPI Reporting, Data Visualization, **Business Intelligence**, Statistical Analysis, and Query Optimization to deliver actionable business insights and support data-driven decision-making.

TECHNICAL SKILLS

Programming Languages: Python, SQL (MySQL), R (Basic)
Data Analytics: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Validation, Statistical Analysis, Time Series Analysis, Correlation Analysis, RFM Analysis, Cohort Analysis, KPI Reporting, Business Intelligence, Data Storytelling
Data Visualization & BI: Power BI, DAX, Power Query, Dashboard Development, Data Visualization, Matplotlib, Seaborn, Microsoft Excel, Jupyter Notebook, Google Colab
Python Libraries: Pandas, NumPy, SciPy
Databases & SQL: MySQL, SQL Joins, CTEs, Window Functions, Subqueries, Query Optimization, Data Modeling, Star Schema
ETL & Data Engineering: ETL, Data Pipelines, Data Integration, Data Quality, Data Validation
Version Control & Collaboration: Git, GitHub, Jira, Agile (Scrum)
Data Concepts: Business Analytics, Trend Analysis, Customer Segmentation, Revenue Analysis, Performance Reporting
Cloud & Data Engineering (Basic): Apache Spark, PySpark, Apache Airflow, dbt, Snowflake, Docker, AWS

PROFESSIONAL EXPERIENCE

Data Analyst Intern | *Bluestock Fintech* **May 2026 – July 2026**

- Processed**, cleaned, validated, and transformed 50,000+ financial** and **stock market** records using **SQL**, **Python (Pandas, NumPy)**, improving **data quality by 15%** and supporting **investment reporting**, **business analytics**, and **data-driven decision-making**.
- Performed **Exploratory Data Analysis (EDA)** on **equity market datasets** to identify **pricing trends**, **anomalies**, and **investment insights**, enabling **business decisions**.
- Automated **ETL/data pipeline** workflows using **SQL** and **Python** to **extract, transform, and integrate** financial data, reducing **manual reporting effort by 20%** and improving **reporting consistency**.
- Designed and developed **interactive Power BI dashboards** to visualize **stock market trends**, **IPO performance**, **KPIs**, and **business metrics**, reducing **manual reporting time by 25%**.
- Wrote and optimized **complex SQL queries** for **data extraction** and **reporting**, improving **query efficiency** while collaborating with **cross-functional teams** using **Git** and **Jira** to ensure **data integrity** and deliver **business requirements**.

PROJECTS

Retail Store Sales Analysis **Apr 2026**

- Processed, cleaned, and transformed **50+ retail sales records** using **Python (Pandas, NumPy)** and **SQL**, improving data quality and increasing inventory demand forecasting accuracy by **15%** through robust data validation and preprocessing.
- Performed **Exploratory Data Analysis (EDA)** using advanced **SQL (CTEs, Joins, Window Functions)** to identify regional sales trends, product performance gaps, and customer purchasing patterns, enabling data-driven business decisions.
- Developed **interactive Power BI dashboards** using **DAX, Power Query, and Star Schema modeling** to monitor Revenue, Profit, Sales, Discounts, and Customer KPIs, reducing manual reporting time by **40%** and improving stakeholder visibility.
- Applied **RFM Segmentation** and **Cohort Analysis** to identify high-value customer segments and retention opportunities, delivering actionable insights that supported targeted marketing strategies and revenue optimization.

COVID-19 Data Analysis **Apr 2026**

- Analyzed **500K+ COVID-19** records across **190+ countries** using **Python (Pandas, NumPy, SciPy)** for EDA, time-series, and statistical analysis (rolling averages, growth rates).
- Developed geographic and trend visualizations using **Matplotlib, Seaborn, and Jupyter Notebook** to communicate infection, recovery, and mortality trends to technical and non-technical audiences.
- Applied **correlation analysis** to evaluate relationships b/w mobility data & regional infection spread, uncovering key trend patterns.

Pizza Sales Data Analysis **March 2026**

- Extracted, cleaned, and transformed **10K+** order records using **MySQL**, ensuring data consistency and performing **EDA** with **Joins, CTEs, Subqueries, and Window Functions** to uncover peak ordering hours, top-selling products, and sales trends.
- Built interactive **Power BI** dashboards using **DAX, Power Query, KPI scorecards, and drill-through reports** to monitor category performance and support data-driven decision-making.
- Optimized complex **SQL** queries for **revenue analysis** by **pizza size** and **category**, improving query performance by **30%** and enhancing reporting efficiency.

EDUCATION

Bachelors in Technology in Computer Science | Rai University Ahmedabad, Gujarat **July 2024 – present**
Senior Secondary Schooling in PCB | H/S Jabra School, Bihar **March 2023 – March 2024**
